

Please do not allow cell phones use in aircraft!
I am a flight attendant, and cramped conditions on board already cause tension. No one wants to listen to another person's loud phone conversation, and I believe fist fights will occur if this action is allowed. Plus, there is no evidence it is safe to use cell phones on board aircraft. Terrorists could use them to coordinate their actions when the cockpit door opens. Flight attendants would not be able to get anyone's attention because of the cell phones. Mostly, you will see violence on board as a result of the annoyance in cramped conditions, believe me, after 14 years of flying, I know what I'm talking about.
